## DETAILED ACTION

### *Specification*

1. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

The following title is suggested: Manufacturing method of circuit elements on a semiconductor wafer using a plurality of masks.

### *Claim Rejections - 35 USC § 112*

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 21 – 24 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

4. The term "expressing" in claim 21 is a relative term which renders the claim indefinite. The term is not defined by the claim, the specification does not provide a standard for ascertaining the requisite degree, and one of ordinary skill in the art would not be reasonably apprised of the scope of the invention.

### *Claim Rejections - 35 USC § 102*

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 2824

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 21 – 24 are rejected under 35 U.S.C. 102(b) as being anticipated by Krolikowski et al.

Regarding claims 21 and 23, Krolikowski et al. discloses expressing a layout pattern of a circuit by using mask patterns prepared for plural circuit elements in figures 9A – 9C1 and column 11, lines 20 – 30.

Regarding claims 22 and 24, Krolikowski et al. discloses that each mask pattern has a mask for positioning, and the positioning is done by superposing one mark on another in figures 9A – 9C1 and column 11, lines 30 – 45.

### ***Conclusion***

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Chen, Palmer, and Fletcher teach using mask patterns.
